Agriculture in Australia

Traditionally, Australia was  for producing wheat and wool, but times have changed in  years, with many farmers  to be more diverse in their crop and livestock range. It is now quite common to see farms with more exotic fruit and vegetables. Farmers are  to sell their produce locally nowadays, but rather to the factories in the cities. As a result, farms are now large-scale  where thousands of tonnes of crops are . Another aspect that is different nowadays is . In the past, farmers would just flood the fields but now it is common to see sprinkler  everywhere. This means that more water is , which has been helpful with the drought that has severely impacted the  of the farms in the  states of the country. Hopefully, the  the farmers have shown in recent times will continue.
